Claims 18 and 19 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The sterols are defined in the specification to be phytosterols at page 6, lines 11-20 and page 10, lines 9-14.

Claims 1, 18 and 19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for phytosterols, does not reasonably provide enablement for the inclusion of all sterols generally in the healthy composition that is set forth in the claims. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Claims 7, 8 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites (extracts) of plants and it is unclear if this phrase is intended to be included or excluded from the product. Claim 7 and 8 include the recitation "(partly broken up)" and it is unclear if the phrase is intended to be included or excluded from the product. An amendment to the claim clarifying these issues would overcome the rejection.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 7-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Joy of Cooking as further evidenced by Carotenoids and Kesharlal in view of Hallstrom for reasons of record.

Applicant urges that a special format of carotenoids. This has been considered but is not persuasive because no difference is seen between the claimed product and that of the references. Applicant urges that the rejection employs hindsight. This is disagreed with. Alternatives to butter, like Hallstrom, are available and known in the art. To use the product f Hallstrom in a cooking recipe would be obvious to one of ordinary skill in the art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
